

VMware Infrastructure Health Check

Overview

You've made a significant investment to virtualize your computing environment; let VMware and our VMware Authorized Consulting (VAC) partners help you get the most from your investment. Virtualization touches many aspects of your data center such as servers, networks and storage, and the organizations and processes that control them.

A VMware Certified Professional consultant will work with your team to understand your unique environment and provide guidance on the best practices for configuring and managing VMware systems. Working together with your team, the consultant will review your VMware Infrastructure and provide concrete, actionable recommendations to optimize your virtual infrastructure.

Deliverables

- Conduct assessment of VMware Infrastructure (up to four ESX hosts) using the VMware HealthAnalyzer virtual appliance to collect inventory, configuration and usage data
- Identify potential opportunities to optimize configuration and improve performance
- Hold an interactive workshop to facilitate knowledge transfer on VMware best practices

Target Audience

Architects and administrators currently using VMware ESX and VirtualCenter who have three or more months of experience with VMware Infrastructure.

Roles and Responsibilities
